Steven H. Sklar, Reg. No. 42,164

In re Appln. of VENKATARAMAN, Balaji
Application No. 10/056,805

tannate in an amount effective for the treatment, management or mitigation of such symptoms.

Applicant further notes that the '597 and '904 patents relied upon in the Office Action did not issue more than one year before the effective filing date of the present application of August 31, 2001 (or even the later filing date of this continuation-in-part application on January 25, 2002). Accordingly, the disclosure in these references is not prior art to pending claims 19-30.

Status of Parent Patent Application

The parent application to which the present application claims priority, namely U.S. Patent Application 09/952,711, issued as U.S. Patent 6,509,492 on January 21, 2003. The parent '492 patent claims a liquid suspension for treating upper respiratory indications comprising dexchlorpheniramine tannate and pseudoephedrine tannate and, optionally dextromethorphan tannate. See claims 3 and 4. The liquid suspension of claims 3 and 4 is useful in the methods of treatment of currently pending claims 19-30.

Conclusion

The application is considered in good and proper form for allowance, and the Examiner is respectfully requested to pass this application to issue. If, in the opinion of the Examiner, a telephone conference would expedite the prosecution of the subject application, the Examiner is invited to call the undersigned attorney.

Respectfully submitted,

Steven H. Sklar, Reg. No. 42,154
